

Entrepreneur in Residence (EIR) – Chatbots & NLP/NLU

The Hive (www.hivedata.com) is a venture fund, with a **co-creation studio** based in Palo Alto, CA that launches **AI and Data** driven startups. The Hive brings a unique model that unites a team of experienced venture capitalists, successful company-builders, and serial entrepreneurs. Our team has created market-leading companies with several billion dollars in exits. We are very thematic, investing in or creating companies that apply AI and large-scale data technologies to transform giant industries. The Hive's strong network, operational experience and technical skillset provide differentiated value to entrepreneurs.

We're seeking an Entrepreneur in Residence to join our team on a full-time basis. We are looking for a highly organized, detail oriented, and hardworking person to help create new disruptive AI based enterprise application solutions with focus on NLP/NLU and chat/voice enabled assistants.

The EIR position is for four months and is an opportunity to launch a startup funded and launched by The Hive.

You must be responsive, flexible and able to succeed within a fast-paced, open collaborative peer environment. You will work closely with other internal teams. In this role, you will:

- Identify whitespaces and come up with detailed research and analysis in use of NLP/NLU in enterprise areas that are ripe for disruption
- Develop new ways and means to organize domain knowledge across enterprise business processes and various verticals such as Finance, Insurance, Health, Retail, etc.
- Develop conversational intelligence workflows using traditional NLP/NLU techniques and as well as new Deep Learning systems.
- Bring up new platforms and technologies quickly in order to rapidly iterate concepts and drive quick proofs-of-concept
- Lead the project providing product and technical leadership in evaluating, understanding and integrating diverse emerging technologies and solutions.
- Prepare requirements, design specifications & architectural documentation
- Work with other team members to develop detailed product specifications, roadmap milestones and marketing plans for the launch of the venture

Qualifications

- Work experience in a leading edge company
- Bachelor's Degree / MS / PhD in Computer Science, or related field
- Working experience in Machine Learning / Deep Learning
- Prior experience in building AI products using NLP / NLU
- Experience leading projects from concept to production
- Understanding of Chatbot Ecosystem
