Principal Front End Engineer

Decision Engines is an Intelligent Business process robotics startup utilizing the power of AI to put business processes on “auto-pilot”. Business processes in enterprises continue to require large amount of human touch points causing delays in transactions and increased costs. Decision Engines cognitive automation platform disrupts this multi-billion dollar industry by automating these processes using AI powered bots and intelligent process orchestration. This is a unique opportunity to change the future of global enterprise businesses operations and anchor the “Autonomous Enterprise” vision.

We are looking for a Front End developer who is passionate about UX and build interfaces that make business process definition and orchestration a joy for business analysts.

- Deep expertise in SPA frameworks and 1 year on Angular 2.0+
- Experience with nodejs, MongoDB or other NoSQL stores.
- Deep functional knowledge and hands on design experience with JSON-based RESTful web services.
- Strong understanding of CSS, Layouts, cross-browser compatibility, general web functions and standards.
- Solid knowledge of open-source web application ecosystem and the libraries available for common tasks.
- Experience with websocket and real-time web services
- Experience with charting libraries suchs as D3.js etc
- Experience bundling npm libraries and webpack, angular cli based build pipelines

MUST HAVE Qualifications

- 5+ years of front-end development on SaaS products.
- Be a Developers Developer!
- Have a great sense of UI style
- Worked in a startup environment

Sample Problems:

Can demonstrate proficiency in for eg..How to create reusable Angular 2 modules for generating forms on the fly from meta-data
